

# RabbitMQ

This feature was removed in version 4.0.0.

## Queues (inbound)

Name	REST API method	Associated Exchanges (see below for details)
netstone-get-character	<a href="#">/Character/{lodestoneId}</a>	netstone-get-character-result netstone-get-character-refreshed
netstone-get-character-class-jobs	<a href="#">/Character/ClassJobs/{lodestoneId}</a>	netstone-get-character-class-jobs-result netstone-get-character-class-jobs-refreshed
netstone-get-character-minions	<a href="#">/Character/Minions/{lodestoneId}</a>	netstone-get-character-minions-result netstone-get-character-minions-refreshed
netstone-get-character-mounts	<a href="#">/Character/Mounts/{lodestoneId}</a>	netstone-get-character-mounts-result netstone-get-character-mounts-refreshed
netstone-get-character-achievements	<a href="#">/Character/Achievements/{lodestoneId}</a>	netstone-get-character-achievements-result netstone-get-character-achievements-refreshed
netstone-get-free-company	<a href="#">/FreeCompany/{lodestoneId}</a>	netstone-get-free-company-result netstone-get-free-company-refreshed
netstone-get-free-company-members	<a href="#">/FreeCompany/Members/{lodestoneId}</a>	netstone-get-free-company-members-result netstone-get-free-company-members-refreshed

## Exchanges (outbound)

Name	Sent When
netstone-get-character-result	Character data requested through queue.
netstone-get-character-refreshed	Character data refreshed from Lodestone.

Name	Sent When
netstone-get-character-class-jobs-result	Character's class jobs requested through queue.
netstone-get-character-class-jobs-refreshed	Character's class jobs refreshed from Lodestone.
netstone-get-character-minions-result	Character's minions requested through queue.
netstone-get-character-minions-refreshed	Character's minions refreshed from Lodestone.
netstone-get-character-mounts-result	Character's mounts requested through queue.
netstone-get-character-mounts-refreshed	Character's mounts refreshed from Lodestone.
netstone-get-character-achievements-result	Character's achievements requested through queue.
netstone-get-character-achievements-refreshed	Character's achievements refreshed from Lodestone.
netstone-get-free-company-result	Free Company data requested through queue.
netstone-get-free-company-refreshed	Free Company data refreshed from Lodestone.
netstone-get-free-company-members-result	Free Company's members requested through queue.
netstone-get-free-company-members-refreshed	Free Company's members refreshed from Lodestone.

- "result" exchanges are always (cached or not) filled when data was requested through inbound queue, NOT when requested through API.

- "refreshed" exchanges are filled whenever data was refreshed from the Lodestone, no matter whether through inbound queue or API. It is however NOT filled when data was returned from cache.
